Setup

To run the code follow the setup and execution instructions provided in the `README.md` file included in this repository.

1 Introduction

1.1 Objectives and Success Criteria

1.2 Contributions and Team Roles

2 Workflow of the Project

2.1 Global Path Planning (*Paolo*)

2.1.1 Algorithm Choice & Rationale

2.1.2 Implementation Details

2.1.3 Tests & Metrics

2.1.4 Challenges Encountered & Fixes

2.2 Orbit Controller (*Raffaele*)

2.2.1 Trajectory Generator & Control Law

2.2.2 Implementation Details

2.2.3 Tests & Metrics

2.2.4 Challenges Encountered & Fixes

2.3 Weak-Spot Detection & Shooting (*Francesco*)

2.3.1 Sensing & Scoring Function

2.3.2 Ballistic Model / Actuation Timing

2.3.3 Tests & Metrics

2.3.4 Challenges Encountered & Fixes

3 System Integration

3.1 ROS 2 Node Graph & Communication Channels

3.2 Integration Strategy and Version Control

3.3 Observed Failure Modes & Mitigations

4 Results

5 Conclusion & Future Improvements

5.1 Potential Improvements

5.2 Unexplored Ideas
